

Government Announces New Plans for Climate Control.

In its continuing drive to safeguard the future for hard-working British families, the Government is to pass legislation concerning Climate Control.

A spokesperson said: 'It's about you being in control of your climate. And we have never been afraid to say that this will cost us all a little extra. It will be good for Britain and good for us all.'

The plan comprises of **modest payments for the various climate conditions** as required. If you want to see **the sky**, there is a charge of £100 per annum. If you want variations in the weather, such as **rain or sun**, then there is a charge of £75 per annum. Per variation. This can of course be paid monthly under the Government's Deferred Climate Payments Plan.

We in Government know that many families will want to have **snow at Xmas**, so we are offering a specially reduced price of £39.99 for the next two years.

With the cost of foreign travel rising all the time, your Government has instructed the Institute for Enhanced Climate Studies to develop a special variation of **really warm weather for Britain**, so that British families can spend their holidays at home instead of having to go off to foreign countries, eat foreign muck and get sick.'
