BROKEN BREXIT
SLIDING OVER THE CLIFF

Only **36.4%** of the UK electorate voted to leave the EU,
the biggest trade group in the world
(referendum turnout was 70% - of them 52% said leave
which equals **36.4%** of the total electorate)

the votes of just over one third of Britons – misinformed by their leaders -
starts the biggest peacetime initiative ever undertaken in British history

now the UK needs to negotiate with 27 EU countries on exit terms
needs to negotiate with 162 WTO countries to agree trading terms
government has no experience of negotiations
proposing to hire consultants to do this
estimated cost over two years £3 billion +

exiting the EU means
saying goodbye to the UK's major trading partner
and its access to many other markets under bilateral agreements
rising prices
rising unemployment
loss of influence

CAN WE EXIT BREXIT?
