

## **TAX AVOIDANCE FOR THE WORKING MAN.**

### **HOW TO ABSOLUTELY MINIMISE YOUR TAX PAYMENTS.**

#### **FULL INSTRUCTIONS FOLLOW:**

##### **Here are the various steps to take to protect your earnings.**

Pay yourself before taxation or ask your employer to pay you gross.

Take that amount and deduct 17.5% as a 'royalty to your parents' for having you. In effect they are the inventors of the formula – you. Deduct this from your gross pay.

Pay the royalty into a British Virgin Islands nominee account where they are the nominees but you are the real owner. If your parents are deceased then use other relatives of the same DNA as you.

Next, create an invoice covering all your normal living expenses for the month. Everything. But charge 99% more for each item. Deduct this from your gross pay.

Invent and set up a shell company, say, 'You International Import/Export Services', in the City, the money-laundering capital of the world

Borrow as much as you can from banks or whoever and don't bother if the interest rate is high. With the borrowed money buy 'You International Import/Export Services'. You can invent a purchase price as high as you wish based upon 'future expected revenues.' Change the name to 'Me International'. Domicile it in Luxembourg. Deduct all of the debt interest from your gross pay.

We will create an invoice to you for our services - deduct that from your gross pay.

**Bingo! Nothing left to pay tax on.**
